**LEGAL NURSE CONSULTING | CASE MANAGEMENT**

**Compassionate, patient-focused registered nurse** – Dedicated to managing patient cases throughout the entire spectrum of care, connecting across hospital systems and community resources to meet the needs of patients and achieve the best possible outcomes.

**Strong background in urgent care and hospital settings** – Seamlessly manage a wide-range of ailments and injuries within rapidly changing environments.

**Patient assessment expertise** – Skilled in assessing conditions through a hands-on caring approach, actively listening to understand the patients' ailments and discomfort, and offering expert consultation and advice following strict healthcare protocols.

**NURSING EXPERIENCE**

POINT HEALTH | Sunnydale, CA

2016 – Present

**Tele-Triage Nurse | Nurse Advice Line**

Brought on-board to assist patients in multiple states calling for medical advice. Assess patients' symptoms, carefully listening to speech and tones to gauge the severity of the ailment. Provide expert advice on pertinent interventions, procedures, studies, home treatments, as well as when to seek medical attention.

- Connect patients to physicians and community resources to assist with health or financial concerns.

MEDICAL PROFESSIONALS HEALTH SERVICES | Akron, CA

1997 – 2016

**Staff Nurse ER (2008 – 2016) | Staff RN ICU (2007 – 2008)**

**ER Technician (1998 – 2007) | Emotional Behavioral Health Technician (1997 – 1998)**

Provided expert patient care within a 20 bed ICU, a level 2 trauma center, and a mental health department, from admissions through to discharge, gathering and recording histories and vital signs and monitoring conditions. Addressed patients' urgent needs, following strict protocols, and communicated with physicians on the patients' status. Administered and monitored medications, IVs, Folly catheters, EKGs, etc.

- Assisted physicians in surgical procedures and participated on the trauma team.
- Clearly educated patients and families on discharge procedures and home care, and ensured they received the proper prescriptions and follow-up medical attention.
- Coordinated across departments and with outside resources, including healthcare and service providers, pharmacies, and case managers, to ensure patients received the services needed.
- Acted as a role model for nursing students and mentored and trained new nursing staff members to the hospital system.
- Contributor on committees and participated in Lean projects to improve processes and develop policies.
- Contributed to enhancements to the documentation process, improving the capture of fees to meet HCAPS guidelines.
